DIGITAL WORKPLACE EVOLUTION

**Engage your teams to envision, deliver
and most importantly adopt modern work
management tools and practices with Acensys**

Transforming Your Digital Workplace

Our Services

Digital Workplace Transformation

Effective design and delivery of workplace transformation programs. Modern tools are a start but a transformation is only effective with the right engagement and transformation journey focused on adoption from the start.

Cloud and Data Center Migrations

We help companies assess their applications and readiness to migrate to the cloud, to select the appropriate target destinations (be it public, private or hybrid cloud) and to then drive the delivery and execution of the migrations and surrounding programme of change.

Service Monitoring Transformation

Service Monitoring, and more specifically, Application Performance Monitoring means understanding your services and monitoring them proactively.

IT Sourcing Transformation

Acensys is experienced and capable of helping companies assess their current sourcing strategy and identify the best way forward for the most cost effective and stable operating model.

Intelligent Automation (RPA)

The capabilities of Intelligent Automation range from simple automation of a manual task, to highly complex logical algorithms based on machine learning capabilities, several decision branches and system integrations. We turn data into processable information and transform it into useable automated processes.

Our Clients

Many of our clients have been with us for years and gratefully position us as their Trusted/Preferred supplier driven by our track-record in consistent delivery of our projects.

Our Partnerships

Enabling us to achieve goals that we believe are important in improving our clients' business performance.
